

Dimension Data selects MESSAGEmanager IP Fax for Cisco Clients

At Cisco Live Melbourne, MESSAGEmanager Solutions will announce that after a thorough evaluation process, Dimension Data, the \$4 billion IT solutions and services provider has selected MESSAGEmanager IP Fax.

As businesses move to Voice over IP (VoIP), they often neglect to consider that traditional fax technology was not designed to work on VoIP networks. In addition, IP-PBX vendors, VARs, and Systems Integrators tend to dismiss fax as an obsolete technology, even though studies show that significant growth in the fax market is expected during the next five years (Davidson Consulting, Computer-Based Fax Markets, 2009-2014).

As a result, Dimension Data's Australian business has chosen MESSAGEmanager IP Fax as its preferred software when deploying Cisco Unified Communications solutions for its clients.

"Many of our clients require a fax server integrated with Cisco IP Telephony, multifunction devices, e-mail, ERP and CRM applications," said Dimension Data General Manager Converged Communications, Rob Weddepohl. "The level of support, quality of the technology and value of the product made MESSAGEmanager a clear choice."

Dimension Data and MESSAGEmanager solution architects work together to deliver virtual and cost effective fax solutions for Dimension Data's clients.

Dimension Data has unrivalled skills and experience around Cisco technology. They hold Cisco Global Certification, are a Cisco Gold Partner in 32 countries and the Australian business was recently named Cisco's Asia Pacific Enterprise Partner of the Year 2010. MESSAGEmanager is a pioneer of fax messaging and communications, delivering the world's first fax server to Telecom Australia in 1986. Today MESSAGEmanager is the IP Fax market leader in the Asia Pacific region.

"MESSAGEmanager IP Fax software provides simple, flexible and field proven connections for users, applications and multifunction devices and has undergone interoperability testing in the Cisco labs," said Ivor Livingston, Chief Executive of MESSAGEmanager Solutions, "confirming our ability to deliver high performance, reliable and scalable fax transmission in Cisco networks."

About MESSAGEmanager Solutions
